

# Status & Strategy for SCC Web Site

Bernard L. Peuto

# Acknowledgements

- Many contributors must be thanked for their efforts
- This is just a guide for discussion

# Brief Status

- Site up and running
  - Fortran and Lisp postings are very good models
  - Editing HTML & others files understood
  - FTP under control
  - Documented guidelines exist
  - Independent Sendmail tool
  - Some admin processes in place (for registering etc..)

# Brief Status (Continued)

- Issues to consider
  - Visitor/active/contributor model must be firmed up
  - Visitor Guide to the site must be established
  - More organizational tab must be added
    - Task list
    - SCC Meeting archive, etc ...
  - File structure need to be established
  - A process for duplicating copies of referenced documents must be established
  - Tie in with Send mail
  - Privacy issues
  - Some slowness

- Current Thinking
  - Visitors do not need to register and will see all published material (majority of the site)
  - Active individuals demonstrating some interest will be added to the scc\_active
  - Contributors having demonstrated their work will be added to the plone site list.
  - Group will be created in the plone site with a designated chair
  - Redirecting email addresses will be used (like chair\_scc@computer.org)

# Guide and Organization

- Current Thinking
  - Front page with goals of Committee
    - Help in viewing available information
    - Pointer to task list
    - Pointer to Archives
    - Pointer to membership tab
  - Tabs for
    - Home
    - Members/Membership
    - Task list
    - SCC meeting archives
    - Suggested links
    - Collecting the collectors
    - xxx

# Feedback and Other Issues

- Discussion on open issues
  - Privacy issues
  - File structure need to be established
  - A process for duplicating copies of referenced documents must be established
- Suggestions on resources /features of the site
  - Bibliographic Database
  - Blog tools
  - Wiki-like tools
  - Others
- Volunteers
