

Posting:**Software Curator - Full-Time**

The Computer History Museum (CHM) is at an exciting stage of growth: located in the heart of Silicon Valley after opening its first phase in a signature building, the Museum is home to the world's largest collection of computing related artifacts and materials. The Museum is currently planning over 20,000 SF of new exhibitions, developing online access to its extensive collection and establishing new programs for the public. To support these goals and ongoing collections activities, CHM seeks a highly motivated and creative individual for the position of Software Curator.

The Software Curator is responsible for the development, documentation, interpretation, physical organization and long-term access of the software collection to the Museum's target audiences. The Software Curator will be a key member of the Museum's Collections & Exhibitions department; supporting ongoing activities and long-term goals. Requirements include: a demonstrated knowledge of computing software history; Master's preferred; a proven ability working with diverse constituencies and leading small teams, e.g. committees and volunteers; familiarity with museum, archive and/or library standards; excellent organizational, time management, and oral/written communication skills; attention to detail; and strong computer skills. Experience in a museum or university setting and experience communicating history and/or technology content to the general public is highly desirable. Salary range: \$40-45K, depending on experience. For more information about CHM, visit www.computerhistory.org. Please send resume to: **curator@computerhistory.org**
